PROFILE

I'm a Computing graduate who's spent the last few years actually doing IT work rather than just studying it — setting up hardware, sorting out technical problems, and keeping a company website running. Alongside that I picked up Java, PHP and JavaScript, and did some hands-on work with AWS and security standards. I'm now looking to move into a Junior Developer or Junior Cybersecurity Analyst role — I like figuring out how things work (and how they break), and I pick things up quickly.

TECHNICAL SKILLS

- Programming & Web: Java (fundamentals), HTML, CSS, JavaScript, PHP, MySQL, WordPress
- Cloud & Security: AWS cloud migration basics, ISO security standards fundamentals
- IT Support: hardware configuration & troubleshooting, RAM/system setup, technical support
- Tools: Git & GitHub (version control, repos, commits), Microsoft Office 365, Google Ads, Google SEO basics
- Other: bilingual (Romanian native, English fluent), used to working in a team and staying organised

EXPERIENCE

Masking Technician & Digital Support — Hard Anodising Treatments Ltd, Kidderminster, UK

Oct 2022 – Present

- Keep the company website updated on WordPress — content, small fixes, general upkeep
- Run the company's social media to help build up its presence online
- Work to precise technical standards on the production side, so quality stays consistent

Configuration Engineer — Greensafe IT, Kidderminster, UK

May 2021 – Sept 2022

- Configured hardware for client deployments, including RAM upgrades and full system setups
- Handled IT support requests and troubleshooting, usually turning issues around quickly

Additional Experience

- Picker/Trainer, DHL Sainsbury's, Worcester, UK (Feb 2019 – Jul 2021) — order picking, quality control, and training new starters on procedures
- Kitchen Assistant, Tappeto Lounge, Kidderminster, UK (Mar 2020 – May 2022) — kitchen operations and hygiene standards, part-time alongside other roles

PROJECTS

5 Minute Habits — personal project | 5-minute-habits.netlify.app

- A small web app that helps people swap mindless scrolling for short, intentional 5-minute habits
- Built with HTML, CSS and JavaScript, using LocalStorage to save progress in the browser
- Includes a focus timer, habit categories, a streak system, a 30-day progress calendar and dark mode
- Deployed live on Netlify — source on GitHub: github.com/opreaelena24/5-minute-habits

EDUCATION

BSc (Hons) Computing — Arden University, Birmingham, UK

Mar 2022 – Aug 2025

- Focus: programming, software development, data analysis, artificial intelligence

Foundation Studies in Business Management — University of Wales Trinity Saint David, Birmingham, UK

Apr 2020 – Sept 2020

Romanian Baccalaureate – Natural Sciences — Dimitrie Gusti High School, Bucharest, Romania

Sept 2006 – Jun 2010

- Equivalent to UK A-levels (RQF Level 3)
